DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5, 6, 8, 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Vandermer.

Vandermer shows a utensil 10 comprising a pair of opposing pockets 36, 40 and a hinge 22, 28, 30 joining the pockets, the hinge biasing the pockets in the closed position of Figure 3 the pockets being separable from the closed position of Figure 3. With respect to claims 2 and 10 note column 2, line 37. With respect to claims 5 and 13 note column 1, line 65. With respect to claims 6 and 8 note the opposing flat surfaces shown in Figure 3.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vandermer in view of Chesterton.

Vandermer does not teach forming the utensil of metal. Chesterton teaches that it is old in the art of hand implements to form the utensil of metal (see line 31). It would have been obvious to form the utensil of Vandermer of metal in the manner of Chesterton since one of ordinary skill in the art at the time of the invention would readily have recognized the advantage of metal construction in enhancing the durability of the utensil.

6. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vandermer in view of Jones.

Vandermer does not teach forming the utensil of paper as claimed. Jones teaches old in the art of hand implements the interchangeability of paper and plastic (see column 3, lines 12-15). It would have been obvious to form the utensil of Vandermer of paper in the manner of Jones since one of ordinary skill in the art at the time of the invention would readily have recognized the expedience of paper in permitting a cheaper and more disposable utensil.

Allowable Subject Matter

7. Claims 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly, the use of pockets in Jordan, Edwards, Kaufman, Jensen, Suzuki, Garrett-Roe, Detwiler, Koffler and Japanese patent to Kyoda, the paper of German patent to Ortner, the ends of the tongs of Fleishman and the color coding in Haak et al.
